Document 10 — Operational Model Map

Operator	[COMPANY NAME], trading as PlayStake
Owner	[COMPLIANCE LEAD NAME], Head of Compliance
Version	0.1 — draft for licence application
Review	On any change of supplier, location, staff role or activity; at least annually
Relates to	Remote operating licence application: operational model (location, provider and operator of all systems and activities, including key equipment); Documents 08, 09

> Draft prepared from the platform as built on 30 September 2026. `[BRACKETS]` must be completed before submission.

1. Purpose

For every system and every business activity, this map states where it happens, who provides it and who operates it. "Provider" is whoever supplies the system or service. "Operator" is whoever runs it and makes the decisions. Document 08 has the system diagram and the full outsourcing detail.

2. Operating model in one paragraph

PlayStake is operated by [COMPANY NAME] from [OPERATING ADDRESS]. The company builds and runs its own gambling software. The software runs on cloud infrastructure rented from Railway in its EU West region (`europe-west4`, Amsterdam, Netherlands); PlayStake staff deploy and administer it. Payments are processed by Stripe. All customer-facing decisions — verification, limits, interactions, complaints, disputes, suspensions, AML — are made by PlayStake staff through the PlayStake admin console. At launch one person, [COMPLIANCE LEAD NAME], holds the compliance, MLRO and operations roles (Master Manual §3).

3. Key equipment

Equipment	Purpose	Provider	Operator	Location
Web service (Next.js, Node 20)	Website, customer and staff interfaces, API, referee console, payment webhooks. No game logic or random number generation (on-site games withdrawn 25 October 2026)	Railway (infrastructure); PlayStake (software)	PlayStake	EU West, `europe-west4` (Netherlands)

Equipment	Purpose	Provider	Operator	Location
Worker service (BullMQ)	Settlement, expiry and no-show handling, dispute escalation, harm and anomaly detection, AML scans, ledger audit, email and webhook delivery, session cleanup	Railway; PlayStake	PlayStake	EU West, `europe-west4` (Netherlands)
PostgreSQL 16	System of record: accounts, ledger, bets, referee audit trail, encrypted identity documents, compliance and audit records; historical game records of the withdrawn on-site games (append-only, no new rows)	Railway	PlayStake	EU West, `europe-west4` (Netherlands)
Database backups	Recovery of the system of record	Railway	PlayStake	[BACKUP LOCATION] — confirm backups are enabled and tested (Document 13)
Redis 7	Job queues, real-time lobby events, worker heartbeat	Railway	PlayStake	EU West, `europe-west4` (Netherlands)
Recorder service (Chrome, ffmpeg)	Records every refereed match: both players' and the referee's streams with sound and match clock, sealed into the audit trail	Railway; PlayStake	PlayStake	EU West, `europe-west4` (Netherlands)
Match-recording storage	Private store of sealed recordings, deleted on schedule	Cloudflare (R2)	PlayStake	EU jurisdiction
Domain and DNS (playstake.org)	Customer access	Namecheap	PlayStake	Global DNS
Source code repository and CI	Change control, automated tests, dependency audit, malware scan	GitHub	PlayStake	GitHub (US)
Staff devices	Administration	[COMPANY / STAFF]	PlayStake staff	[STAFF LOCATIONS]

4. Activities

Activity	Where it is done	Provider	Operator	Notes
Customer registration	Web service	PlayStake	PlayStake	Optional Google sign-in (Google)
Age and identity verification	Didit hosted check; web service; admin console	Didit (electronic checks); PlayStake	PlayStake (decisions); staff review borderline cases and the upload fallback	Didit in the EU (Spain); DPIA Document 17

Activity	Where it is done	Provider	Operator	Notes
GAMSTOP checks	Web service → GAMSTOP	GAMSTOP	PlayStake	Planned
Sanctions and PEP screening	Admin console (manual); planned supplier	[SCREENING PROVIDER]	PlayStake (MLRO)	Manual check against OFSI list until contracted
Deposits	Stripe (card capture); web service (ledger)	Stripe	PlayStake	Stripe in test mode until launch
Withdrawals	Web service (ledger); Stripe Connect (payout)	Stripe	PlayStake	
Challenges and match management	Web service, Redis	PlayStake	PlayStake	
Game play	Players' own consoles or PCs; third-party games (EA SPORTS FC 27, Tekken 8)	Game publishers	Players	PlayStake runs no games and no random number generation since 25 October 2026
Stream-match refereeing	Referee console; Kick video	PlayStake (software); Kick (video)	Independent referees engaged by PlayStake	Referees vetted and audited (Policy 01)
Match recording	Recorder service; Cloudflare R2	PlayStake; Cloudflare	PlayStake	Every refereed match; DPIA Document 18
Result verification and disputes	Web service, worker; admin console; reviewer pages	PlayStake	Admins, or referees approved as independent dispute reviewers	Reviewer can't be a player, the match referee, or linked to a player by a follow or block
Customer funds protection disclosure	Web service	PlayStake	PlayStake	Rating "not protected – no segregation"; acknowledged before deposit and six-monthly (Policy 19)
Settlement and payouts to balances	Worker service / web service	PlayStake	PlayStake	
Safer gambling: limits, breaks, reminders, interactions	Web service, worker; admin console	PlayStake	PlayStake staff	Policies 03–05
AML monitoring and case management	Worker; admin console	PlayStake	MLRO	Policy 07

Activity	Where it is done	Provider	Operator	Notes
Fraud and anomaly detection	Worker; admin console	PlayStake (Stripe Radar planned)	PlayStake staff	Policy 01
Customer service	Email (support@playstake.org)	Google Workspace	PlayStake staff	
Complaints	Website form; admin console	PlayStake	Complaints manager	Policy 02
ADR	IBAS	IBAS	IBAS	To sign
Transactional email	Worker outbox → Resend, from support@playstake.org	Resend	PlayStake	
Marketing	Not carried out	—	—	No affiliates or ads
Website analytics	Google Analytics 4	Google	PlayStake	Public pages only, after consent
Error monitoring and alerting	Sentry; admin email alerts	Sentry	PlayStake	
Ledger audit and reconciliation	Worker (daily 03:00 UTC)	PlayStake	PlayStake	
Software development and release	GitHub → Railway deploy	GitHub, Railway	PlayStake	Tested in CI before release (Document 11)
Security testing	[PEN TEST PROVIDER]; annual security audit	[AUDITOR]	PlayStake	Not yet commissioned (Document 13)
Regulatory reporting	Email / eServices	—	Head of Compliance	Document 14

5. Changes

A change to any location, provider or operator in this map is assessed before it happens. Changes to where remote gambling equipment is located, and to key suppliers, are reported to the Commission as key events where LCCP 15.2.1 requires (Document 14).

Version	Date	Change
0.1	30 September 2026	First draft
0.2	27 October 2026	Region recorded; recorder service and R2; Didit; independent dispute review; funds-protection disclosure; analytics and Google Workspace
